## SKILLS

---

- **Language** : Java, JavaScript
- **Technologies** : SpringBoot, Maven, Git, Docker, AWS (EC2, ECS, SNS, SQS), REST APIs, Microservices, React
- **Database & ORMs** : MySQL, DynamoDB, Hibernate

## EXPERIENCE

---

### 6 LIVO TECHNOLOGIES | Software Engineer

January 2025 - Present

ViTWO | Java, SpringBoot, Microservices, AWS, Docker, MySQL, DataBricks

- Engineered and maintained 4+ microservices using **Java** and **SpringBoot**, supporting the backend architecture of a cloud native ERP platform with **5K+** daily users.
- Designed **RESTful APIs** and integrated Apache Kafka for asynchronous event-driven communication, reducing cross service response times by **25%**.
- Containerized services using **Docker** and managed deployments through **AWS ECS** on **EC2**, enabling deployments and reducing downtime during releases.
- Leveraged AWS services including **EC2**, **S3**, **DynamoDB**, and **CloudWatch** to build scalable, secure, and cost-efficient cloud native services.
- Tuned data access and schema design in **DynamoDB** to handle high-throughput read/write operations with minimal latency.
- Set up automated CI/CD pipelines using **GitHub Actions** and **AWS CodeBuild**, cutting deployment time by **60%** and ensuring consistent delivery workflows.
- Wrote unit and integration tests with **JUnit** and **Mockito**, achieving over **70%** code coverage and reducing production bugs.
- **Automated daily generation of diagnostic summary reports** on ERP application test failures. Integrated failure data into **Grok API (Llama 3.3 Versatile B)**, leveraging **NLP/ML insights** to accelerate defect resolution.

### AGNIK INT. PVT LTD | Software Engineer

March 2024 - December 2024

AutoHealth & Vyncs | Java, Spring Boot, Microservices, MySQL, React

- Engineered a **Spring Boot microservice** to process OBD-II trouble codes and metrics, improving the accuracy of car inspection reports generation by **11%**
- Implemented a reports comparison and deduplication mechanism using Java and Hibernate, accurately computing per-day unique reports and reducing duplication by **33.5%**.
- Optimized **Spring Data JPA** queries for pagination and filtering on a blog service endpoint, reducing page load time by **7%** and dynamically configuring canonicals for enhanced SEO.
- Developed and **containerized** search APIs using **Docker** and **Spring Boot**, deployed to **AWS ECS/EC2**, resulting in a **25%** increase in user engagement

## PROJECTS

---

### BankingApp Backend | Java, Spring Boot, Spring Data JPA, REST APIs, MySQL, Maven | [GitHub](#)

- Built a complete banking backend system in **SpringBoot** with features like account creation, deposit, withdrawal, and fund transfer between users.
- Designed RESTful APIs with Spring Data JPA and MySQL, implementing layered architecture and clean service separation.

### Employee Attendance & Leave Management | Java, Spring Boot, Spring Security, MySQL, AWS SNS | [GitHub](#)

- Built a comprehensive system for managing employee attendance and leave requests, utilizing **Spring Boot** for the backend logic and **MySQL** for data persistence.
- Implemented robust **Role-Based Access Control (RBAC)** using Spring Security to enforce distinct permissions for Employees, Managers, and HR. Integrated AWS SNS for real-time, automated leave approval and rejection notifications.

## EDUCATION

---

Brainware University  
B.Tech CSE | CGPA - **9.66**

August 2021 - July 2024
